

CRITIQUES CINÉMATOGRAPHIQUES

Dans le cadre du dispositif Lycéens au Cinéma et du projet « Corps à Cœur », les élèves de la classe ont pu voir deux films au Cinématographe.

J'ai perdu mon corps

The film was created by Jeremy Calpin.

« J'ai perdu mon corps » is a unique crafted animated film that tells a captivating story of loss, perseverance and self-discovery. A severed hand navigates her way through the streets of Paris in search of her body, while flashbacks explore the emotional background of the main character: Nawfel, who, during his childhood, lost his parents in a car accident.

The music completes the storyline perfectly. We highly recommend the film to everyone.

This story deals with unrequited love. Nawfel first met Gabrielle as he was working as a pizza delivery man. After this first encounter, he does everything to find her again.

The Fits : An artistic film that gives you food for thought

A film written and made by Anna Rose HOLMER in the USA, the movie is about a girl, Toni, she is educated by her brother and she practices boxing.

Toni practices boxing in the same gym as her brother she has developed a passion for dancing and would like to continue, so she joins a dancing club but she is rejected by girls because she practices boxing.

Toni decides to give up boxing for be more feminine and starts dancing like other girls and practices drill as she wants.

But, a problem occurs, many epileptic crises happen, her friend Maya and Beesie she has met in the dancing club had epileptic crisis like other girls in the dancing club, the story ends with an epileptic crisis of the main character.

The good points about the film are that the acting is good, the characters practice sport, the fitness element is interesting because we learn much about Tony who decides to change sports from boxing to dancing.

The bad points about the film is the meaning of the movie, the movie does not have any point and the message of the movie is hard to understand, and the ending of "The Fits" is special because we don't understand why girls suffer from epileptic crisis.
