

Erasmus+ Exchange between Lycée Livet and Spinoza Lyceum in Amsterdam: Promoting Sustainable Cities

Co-funded by
the European Union

Erasmus+
Enriching lives, opening minds.

From March 12th to 18th 2024, Lycée Livet in Nantes had the pleasure of welcoming 17 students from Spinoza Lyceum in Amsterdam, the Netherlands, as part of an Erasmus+ project. This project, co-funded by the European Union, aimed to promote the values of international education while exploring the crucial theme of sustainable cities, aligned with the UN's 11th Sustainable Development Goal.

The exchange was an enriching opportunity for students from both schools to discover new cultures, share experiences and work together on activities related to urban sustainability.

One of the highlights of the week-long exchange was the exploration of activities linked to sustainable cities. Through workshops, students were able to deepen their understanding of the environmental and societal issues facing modern cities. These activities encouraged critical thinking and creativity, enabling participants to come up with innovative solutions to make our cities more sustainable and resilient.

In addition to activities focusing on urban sustainability, the pupils also had the opportunity to strengthen their bonds during a tree-climbing excursion, fostering team spirit and cooperation. What's more, discovering the iconic symbols of Nantes, such as the Machines de l'île and the mechanical elephant, allowed the Dutch students to immerse themselves in the history and heritage of this dynamic port city.
